DIGITAL POWER

# General Seniority Guidelines

V1.0

# General seniority guidelines

## Setup

Below, you can find guidelines about the expectations per seniority level that apply to all consultants within Digital Power. Every DiP discipline (CX, DA, DE, Research, TWA) has additional guidelines with discipline-specific expectations in addition to the general ones.

- The table below is **not** a checklist:
  - The guidelines show the general expectations for a consultant at that seniority level.
  - A consultant does not have to match every expectation to be promoted to that seniority level, as long as the consultant has a well-founded argument on why that expectation is not suitable/applicable in their specific situation.
- Consultants can be either a specialist or a generalist and can determine their own focus, these guidelines are/should be applicable for either one of these.
  - Short definitions of *generalist* and *specialist*:
    - A *generalist* is a consultant who combines knowledge and skills from various areas of expertise, using a multitude of tools, methods, techniques in their daily tasks.
    - A *specialist* is a consultant who's knowledge and skills revolve around one area of expertise, using tools, methods, techniques specific to that area in their daily tasks.
- The seniority guidelines build up per seniority level, which means the following: The expectations of a junior are added on top of what is expected of a trainee. The expectations of a medior are added on top of what is expected of a trainee and a junior, etc.
- The following abilities apply to all seniority levels: All consultants have a passion for data, have the capacity to learn and develop in a short amount of time, can work together with colleagues, participate in internal knowledge sharing and ask peers actively for input or advice.
- For every seniority level we expect you to have multiple examples for the given guidelines for a longer period of time, not just in one instance or circumstance. For example: once having handled a complex project at a client is not enough to become senior based on independence.

| | **Trainee**<br>*Talent and motivation* | **Junior**<br>*Delivering output and building a strong foundation* | **Medior**<br>*Widely deployable, responsible, and self-reliant* | **Senior**<br>*Experience, looking beyond the assignment, and in-depth knowledge* |
|---|---|---|---|---|
| *Independence* | Able to perform basic operational tasks for a client under supervision of a more senior colleague. | Able to perform basic operational tasks at a client by themselves, and can do meaningful work under the guidance of more senior colleagues. | Able to perform most tasks and different types of assignments at a client by themselves, independently. | Able to handle complex projects at a client by themselves. |
| *Responsibility* | | Can take responsibility for their own work, if not too complicated. | Can manage and take responsibility for their own work. | Can take full responsibility for their team or project. |
| *Communication* | | Able to communicate well with peers in their own domain. | Able to communicate well with peers in their own and related domains. | Able to communicate well with peers in all domains and with other stakeholders (e.g. program managers, security officers, etc.). |
| *Proactivity* | | Receives tasks, and tries to be as proactive as possible. | Can be critical on received tasks, and tries to spot opportunities. | Can proactively advise customers, can identify and communicate issues and opportunities, takes initiative. |
| *Knowledge* | | Has a solid foundation of knowledge and skills, on which they can quickly build. | Has a solid foundation of knowledge and skills, on which they can quickly build. | Has knowledge that allows them to help trainees, juniors and mediors. This knowledge helps them solve most of their own problems and the clients' questions. |
| *Digital Power's development* | | | Can help with the development of DiP (e.g. internal projects, job interviews, marketing content) | Can help with the development of DiP (e.g. internal projects, job interviews, marketing content) |
| *Understanding context* | | | Able to ask the right questions and grasp the needs of their clients. | Able to understand the complete business context (e.g. needs, dynamic, business models) and their own impact. Can make decisions based on strategy for the future. |
